

PINS

Spot-Ons and companion clips, sold separately, are a convenient and proven method for fastening insulation blanket or board to sheet metal. Spot-Ons are ring shanked pins, made of 12 gauge low carbon steel, annealed and zinc-plated. Apply using any portable or stationary resistance welding unit with hollow magnetic tip. Available in four lengths, Spot-Ons can accommodate ½"–2" thick insulation.

PART #	PRODUCT DESCRIPTION
308103	1 Case w/ (1,000) ¾" Pins
308105	1 Case w/ (1,000) 1¼" Pins
308107	1 Case w/ (1,000) 2" Pins
308104	1 Case w/ (5,000) ¾" Pins
308106	1 Case w/ (5,000) 1¼" Pins
308108	1 Case w/ (5,000) 2" Pins

CLIPS

The companion clips, sold separately, are easy to install over the pin tip. They will hold any board or blanket insulation in place.

PART #	PRODUCT DESCRIPTION
308325	1 Case w/ 1,000 Companion Clips
308327	1 Case w/ 5,000 Companion Clips

SPOT-ONS PIN WELDER

A reliable, easy to maintain, medium to heavy-duty pin welder.

PART #	PRODUCT DESCRIPTION
308179	(1) 220V Pin Welder & Case

FEATURES AND BENEFITS

- Weld Spot-On Pins to galvanized and cold rolled light gauge sheet metal
- Fitted with dual switches activated by a single trigger switch
- Weld timer assures consistent welds
- Well balanced
- One hand operation
- Can be hung from a retractable overhead cable reel
- Application Rate: Up to 8 per minute on 19–22 gauge and up to 12 per minute on 24 gauge or lighter
- Fuse-20 Amps
