

PATENTED TECHNOLOGY

Once in a while, a solution to a shop problem comes along that is so simple yet so reliable that one can hardly believe it actually works. DynAir offers the Vane Setting tool, Vane Setter, made especially for use with Dyn-O-Rail™ and Dyn-O-Rail Jr.™ Vane Setter will save considerable assembly time and money, producing flawless, dependable turning vane assemblies. The tool is made to fit the rail depressions exactly, is self-centering and, when activated, splits, bends over and sets the vane in place so that it cannot work loose.

PART #	PRODUCT DESCRIPTION	QTY.
304639	VANE SETTER (VST-1)	1

FEATURES AND BENEFITS

- Combination of vane "dimple" configuration and DynAir's patented Vane Setter yields the most reliable vane-to-rail assembly in the industry
- Punched holes at both ends of slot act as "Claws™" to hold vane end secure and allow vane thicknesses up to #16 gauge
- Vane Setter works equally well on double or hollow vanes
