

# Splitter Damper Bracket

For use with Ball Swivel Damper Accessories

## FEATURES AND BENEFITS

- Completely adjustable
- Locks securely
- Heavy gauge stamping, zinc-plated

Splitter Damper Brackets consist of a 16 gauge zinc-plated stamping, a brass pivot, a stainless steel spring, a steel "Slider" and a compression ring/locknut assembly. This assembly locks securely, by firmly clamping the control rod in position, and the "Slider" allows for self-alignment with the ball joint. Splitter Damper Brackets are also available with a tapped brass pivot and set screw.
