

Contractor Approved and Backed By a Warranty You Can Trust

The Hardcast Foil-Sealant Duct Sealing System, a system that reduces ductwork air leakage, energy loss and moisture intrusion, is a combination of rolled sealant and mastic.

This system includes Hardcast's Iron-Grip® 601, Spray-Seal™ or Versa-Grip™ 181 liquid mastic sealant. Once the liquid sealant has cured completely; the mastic is overlaid with a 4" wide strip of AFT-701 rolled sealant. When properly installed, the Hardcast Foil-Sealant Duct Sealing System is eligible for a 10-year material only warranty.

As a leading pioneer in the HVAC sealant industry, Carlisle HVAC's products are contractor approved, award winning and now backed by a warranty you can trust. Ensure the longevity and efficiency of rooftop ductwork and HVAC equipment with our Hardcast Foil-Sealant Duct Sealing System. Additional details available by emailing info@carlislehvac.com.
