

# Instrument Test Port

For Duct Performance Monitoring  
Damper Accessories

The PTP-1 is an Instrument Test Port, consisting of a ZAMAC (zinc) alloy body casting, which is installed over a sponge neoprene gasket. This housing is internally threaded to accept a precision molded high density polyethylene cap, fitted with a neoprene "O" ring, rendering it leak proof. The cap is red in color making it easy to locate when conducting pressure/velocity tests. It withstands continuous operating temperatures of 165°F (72°C) and intermittent operating temperatures up to 215°F (100°C). Port cap has exceptional dimensional stability and is impervious to most chemicals and freezing temperatures down to -94°F (-70°C).

## FEATURES AND BENEFITS

- Economical, leak proof cap
- ZAMAC alloy housing
- 3/4" opening accepts pitot or velometer
- Includes sponge neoprene gasket and "O" ring to eliminate leakage
- Bright red cap is easy to locate
